Takia Tahmid

Buffalo, NY 14212 | https://www.linkedin.com/in/takia-tahmid-195900349/ | https://github.com/takiatah | (716) 604-7745 | takia.t1357@gmail.com

SUMMARY

Third-year Computer Science student at the University at Buffalo and Data Science Research Assistant with experience in software development, web development, machine learning, data engineering and analysis.

EDUCATION

University at Buffalo—SUNY | **BS in Computer Science** | **GPA:** 4.0 **Expected 2028**

Coursework: Data Structures, Algorithms, Statistics, STEM Communications, Software Engineering, Systems Programming, Probability, Computer Organization, Programming Languages

WORK EXPERIENCE

Data Science Research Assistant - Dr. Zhuang's Research Group **Aug 2026 – Present**

- Clean, transform, and analyze government macroeconomic datasets to develop risk insights
- Apply mathematical modeling and machine learning to develop, train, and refine predictive models for evaluating international trade risk and predict disruptions in global supply chains
- Collaborate with researchers to investigate decision-risk and communicate findings during weekly meetings

UB Math Place Tutor - University at Buffalo **Aug 2026 – Present**

- Provide tutoring to help students develop mathematical reasoning and problem-solving skills

Teaching Assistant – Department of Computer Science, University at Buffalo **Jan 2026 – May 2026**

- Prepared and led weekly recitation sessions to reinforce topics including proofs and graph theory
- Proctored exams and graded assignments with accuracy, collaborating often with faculty

RELEVANT PROJECT EXPERIENCE

Pathfinding and AI System: Implemented pathfinding algorithms in a game and simple AI using object-oriented programming for state-based enemy behavior, enabling dynamic actions

Graph-Based Network Routing Algorithm: Developed a graph-based network routing algorithm to optimize packet delivery and profit in a simulated environment

Retail Sales Analysis (GitHub)**:** Processed and performed exploratory data analysis using Python and SQL on sales data and made Matplotlib visualizations to communicate business recommendations

Olive & Vine Restaurant Website (GitHub)**:** Built a responsive multi-page restaurant website with custom layouts, navigation, animations, and mobile-friendly design using HTML, Bootstrap, JavaScript, and CSS

Snake Game (GitHub)**:** Built an object-oriented Java game with controls, collision detection, and scores

Dynamic Memory Allocator: Built a custom dynamic memory allocator in C to manage heap allocations

Message Serialization System: Implemented a message serialization system in C for a chat server, parsing user commands and packing data into network packets with memory management

Text Adventure Game: Built a game that responds to user input using functional programming in OCaml

CERTIFICATIONS

Google Data Analytics Professional Certificate – Google **May 2026**

Data cleaning, SQL, data analysis, data visualization, Excel, Python/Pandas, Tableau, Git

Machine Learning Specialization – DeepLearning.AI **Aug 2026**

Reinforcement learning, neural networks, model evaluation, clustering, Scikit-learn, TensorFlow, recommender systems

Meta Full Stack Developer: Front-End & Back-End from Scratch Specialization – Meta **In progress**

REST APIs, authentication, responsive web design, HTML/CSS, JavaScript, React, Django, SQL, Git

SKILLS

Programming Languages: Python (Django), SQL (PostgreSQL, MySQL), Java, C, JavaScript (React.js, Node.js), Go

Tools: Git, AWS, BeautifulSoup, TensorFlow, Microsoft Office 365, Excel, Tableau, Power BI, Figma, SSH, Linux

Skills: Data Cleaning & Analysis, Data Engineering, Web Scraping, Front-end, Back-end, Cloud Services, OOP, Machine Learning, Communication, Research, Leadership, Functional Programming, CI/CD, ETL/ELT

ACCOMPLISHMENTS

Grace Capen Award, Empowering Advancement Scholar, Pride of NY Scholarship, Dean's List, HS Valedictorian
